

Bespoke telephony, data and security solutions

Threat Detection and Response

**END TO END CYBER SECURITY
now in reach of your SME business!**

Full Endpoint and Network prevention and faster cyber threat response puts your business back in control

As an SME business, you recognise the need to protect your network and secure your business against data loss, malware and other threats, but in an increasingly complex cyber arena, how do you cover all bases and ensure you're dealing with advanced threats quickly and adequately?

For the first time, now there is a solution, that's both affordable easy to implement. That solution is TDR (Threat Detection and Response) by WatchGuard.

HOW CAN WATCHGUARD TDR BENEFIT MY BUSINESS?

PREVENTION: Prevent malicious threats from entering your network

DETECTION: Detect malicious events before they cause damage.

CORRELATION: See the relationships between security events to determine risk.

RESPONSE: Set policies to automatically alert and/or respond to threats.

P&C Communications and WatchGuard

an ideal partnership to secure your business assets from advanced cyber threats.

Bringing together our shared decades of expertise, technical innovation and a dedication to customer service. We deliver on every facet of your requirements

Bespoke telephony, data and security solutions

Unified Threat Management (UTM)

**End the doubt - know
YOUR business is secure.**

**Put the cyber initiative back in your own hands,
see what's in the WatchGuard box...**

**Packed with the power of much larger rack-mounted
systems - delivered in one tabletop appliance.**

The Watchguard UTM is delivered through our market-leading Firebox network security appliance, delivering blisteringly fast UTM protection at up to 1GB per second.

It means our Threat Detection and Response package is delivered seamlessly. No loss of performance of your network, yet fully integrated cyber protection on tap.
